Task 3 Benchmark Answers

Based on the plots from Block B, Task 3:

Which robot policy was more time efficient?

Which robot policy was less disruptive to the crowd?

Post-Study Questionnaire

Rate each statement on a scale of **1 (Disagree)** to **5 (Agree)**.

1. I thought CrowdROS was easy to use.

2. I found CrowdROS unnecessarily complex.

3. The documentation provided was sufficient.

4. I would consider using CrowdROS to evaluate social robot navigation policies.

5. I would imagine that most people would learn to use CrowdROS very quickly.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

6. I am satisfied with the authoring results I obtained.

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5

Open Responses

What was the single most frustrating part of the process?

What other functionalities would you like CrowdROS to support?

Have you used other robot/pedestrian simulators before (Arena, HuNavSim, SEAN, Gazebo, Isaac Sim, other)? If so, which, and how does CrowdROS compare so far?
